WEDDING FAIRYTALE AT LAKE COMO

Full of joy we accompany today photographer **Katerina Kutas** and wedding planner **Kseniya Masalovich** on a trip to Italy. Together with a creative team they were inspired by the idyll of the beautiful Lake Como to create this multifaceted styled shoot.

Pure love that knows no boundaries or distances. Two hearts that live miles apart, but feel a constant connection and can finally realize the greatest dream – the dream of togetherness.

In busy Milan, a passionate Sicilian soul met the elegance of a girl from the North. After years of a long-distance relationship, they wished to start their life side by side with a small wedding. And what better place for a dreamlike ceremony than Lake Como?

The morning at the lake was in a natural harmony with the bride's soul. Happiness shone in her blue eyes like a light reflection of the sunrise on the water.

The soft hues of the flowers in her suite created a warm moment while the soft touch of the silk boudoir embraced the delicate silhouette of the distinctive bride.

The elegance of the historic **Villa Cipressi** created the perfect atmosphere for an Italian wedding.

With palm leaves and summer flowers, framed by a mise en place in vintage style, stylist **Paola Maly** created a modern and tasteful overall picture. This moment when the south meets the north and the deep blue lake formed a stylish setting for colorful Italian architecture and decoration.

With great attention to detail, the team created a romantic place of ceremony, surrounded by the natural light of the candles and in warm harmony with the sunset on the lake.

The sunset accompanied the sweet bridal couple on a boat trip, where they ended their wonderful day and started their life together.
