Villa Cipressi – Historical and Botanical Gem on Lake Como

Share now

27.08.2020

When the irresistible charm of nature and the stunning mountain scenery meets the historical heritage and comfort created by man, the result is the ideal place to realize the dream of the perfect holiday. It is this unique combination that awaits visitors to one of the most picturesque places in Europe. Here, in a romantic village of Varenna, on the coast of Lake Como, is situated a marvelous complex of buildings and gardens. This tranquil property bears the name of **Villa Cipressi**, and this year it became the winner of **Luxury Lifestyle Awards** in the category of **The Best Luxury Hotels in the Lake Como Area, Italy**.

The property of **Villa Cipressi** has a rich history that dates back almost six centuries. It consists of three main buildings, each of which used to be a private residence. The oldest one was built in the 1400s, and today it hosts the breakfast room and 5 fascinating bedrooms. The second building dates back to the 1700s, while the newest of them was constructed in the 19th century – it houses the hotel's reception and part of the rooms. During the past centuries, **Villa Cipressi** belonged to the illustrious owners, including the Serponti family, Baron Isimbaldi, the Andreossi family, the publisher Accame, and today it is a public property mainly of the Municipality of Varenna.

The hotel offers 31 bright and spacious rooms with stylish décor. Laminate floorings, wooden furniture, black-and-white photos on the walls, and other interior elements create a mix of traditional feel and contemporary ambience. Most of the rooms offer wonderful lake views.

“On behalf of the team of **Villa Cipressi**, I express our gratitude to the respected committee of **Luxury Lifestyle Awards** for recognizing our hotel as one of the best Italian hotels. It has an amazing location and marvelous natural conditions, and we do our best for our guests to fully enjoy these benefits,” said Ludovica Rocchi, Brand Ambassador of R-Collection Hotels.

One of the main attractions at **Villa Cipressi** is the hotel's magnificent botanical garden. This floral treasure of various beautiful plants with some species unusual for this region, including American agaves, palms, cypresses, strawberry trees, tamarisk, camellias, hydrangeas, calycanthus, sarcococca, and many other species to enjoy their look and scent.
